

CONTINUING PROFESSIONAL DEVELOPMENT (CPD)

FOR SIPTU HEALTH
DIVISION MEMBERS

CPD is a lifelong process of both structured and informal learning that encompasses experiences, activities and processes that contribute towards the development of a health care professional.

In time, it will be essential for every health care professional to engage in CPD, following registration, in order to acquire new knowledge and competence to practise effectively in an ever-changing health care environment.

Continuing professional and personal development are required in order to maintain and enhance professional standards and to provide quality, competent and safe patient care.
